### **Report description:**

While hair was not as severely impacted by the pandemic lockdowns as other products such as fragrance and colour cosmetics, it was still negatively impacted and suffered a decline in value and volume sales in 2020. In 2021, with society gradually opening up, and people looking to present themselves well, hair care registered an increase in current value and volume sales. Sales professional hair care registered the highest current growth, due to hair salons being open once again.
