Report description:

The Vietnam water purifier market stood at USD263.77 million in 2021 and is expected to grow at a CAGR of 9.88% in the forecast period, 2023-2027, to reach USD448.21 million by 2027. The market is driven by the factors such as growing health consciousness among consumers and a shortage of clean drinking water. Also, the availability of advanced and affordable water purifiers in the market and the emergence of online sales channels are expected to create lucrative growth opportunities for the Vietnam water purifier market in the forecast period.

Vietnam is located in the Southeastern part of Asia and is ranked in 15th position by population across the globe. Most of the population lives along the three main rivers of Vietnam: Thai Binh, Mekong Delta, and Dong Nai. Vietnam witnesses uneven rainfall throughout the year, and due to a lack of sufficient infrastructure, there is a shortage of drinking water in the country. The water is highly contaminated and requires the filtration process to make it suitable for drinking purposes. Consumers are getting aware of the health risks associated with drinking unclean water. People are willing to spend more to make the water healthy for drinking purposes. The need to drink clean drinking water and increased health awareness among consumers is expected to fuel the growth of the Vietnam water purifier market for the next five years.

The Vietnam water purifier market is segmented based on type, technology, sales channel, region, and competitive landscape. On the basis of regional analysis, Northern Vietnam led the market in 2021 and captured 43.67% of the overall market share. The region is expected to maintain its dominance for the next five years. The drinking water in parts of Northern Vietnam consists of high levels of arsenic which is harmful to the body. The rise in the awareness of the consumers and the increased expenditure
