Report description:

Dammam and Jeddah are Saudi Arabia's most economically vibrant cities. The cities' economic strength is partially supported by elevated consumer expenditure and extensive digitalisation. Nevertheless, Jubail holds the greatest potential for future economic growth. However, challenges for the country's cities will persist - in the near term, increasing global inflation, and in the longer run, burdens on cities' infrastructure, due to large and increasing populations.

Euromonitor International's City Review reports analyse key trends and developments in 126 world's major cities. They provide localised city information in terms of economy, consumer lifestyles, housing and transport and city environment and offer valuable insights for strategic planning.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
