- Site License Price \$4500.00
- Enterprise Price \$6750.00

Report description:

DelveInsight's, "Dental Implants-Pipeline Insight and 2022," report provides comprehensive insights about 20+ companies and 20+ pipeline devices in Dental Implants pipeline landscape. Some of the key factors expected to fuel market growth are growing dental implant applications in different therapeutic areas. Prosthetics play an important role in raising the market for these implants through oral rehabilitation, helping to regain a patient's oral function and facial shape. Due to disadvantages of removable prosthetics, such as pain, loss of natural appearance, and the need for maintenance, the acceptance level for dental implants is growing among patients and dental surgeons. Prostheses installed on dental implants do not penetrate soft tissues and improve aesthetics, which is expected to further fuel development in the industry. This report provides a detailed study of the emerging Dental Implants devices along with competitive landscape to help better understand the emerging Dental Implants devices.

Geography Covered

- Global coverage

Dental Implants Overview

Dental Implants: Understanding

One of the key factors favoring the market for dental implants are also the rising number of dental injuries due to road accidents and sports injuries. Dental implants are long-term replacements that hold adjacent teeth in case. It is known as the only technique of restoration that retains and stimulates the natural bone and also acts as a stable support for dentures. In addition, unlike removable dentures, dental implants enhance a person's physical appearance and offer comfort and convenience.

Factors such as increased healthcare spending, oral hygiene awareness, and the use of advanced oral care technologies are expected to significantly boost the growth of the demand for dental implants. The prevalence of tooth decay among the geriatric population is strong, which is likely to further strengthen the market for procedures for tooth replacement. Therefore this indicates a strong demand for dental implants.

Dental Implants Competitive Assessment

This segment of the Dental Implants report encloses its detailed analysis of various pipeline devices which include product description, licensing and collaboration details and other developmental activities including pipeline territories, regulatory paths and estimated approval dates and the latest news and press releases. The report also provides list of major players involved in the

pipeline product development.

- Material Type

Dental Implants can be divided based on Type of material- Titanium Dental Implants, Zirconium Dental Implants - are covered in this report.

- Product Price

Dental Implants can be divided based on Product Price -Premium Dental Implants, Non-premium Dental Implants.

- Implant Type

Dental Implants can be divided based on their placement Types- Endosteal, Subperiosteal.

- Major Players in Dental Implants

There are approx. 20+ key companies which are developing the products for Dental Implants.

- NiTiDent Tuah Porous NiTi Dental Implants: Nitium Technology Sdn Bhd

The newly developed NiTiDent Tuah porous NiTi dental implant (from Nitium Technology Sdn Bhd) is used for single tooth gap in the posterior mandible. The study is estimated to be complete by March 2022.

- T3 short Dental Implant: Zimmer Biomet

Patients in need of dental implants in the posterior maxilla and mandible will be treated with the T3 short implant. The duration of the study will be approximately 4 years from initiation to completion of data analysis and reporting. The study is estimated to be complete by December 2025.

Further product details are provided in the report??..

Dental Implants Competitive Benchmarking

This segment of the reports provides analysis of the pipeline report to give a clear understanding of the comparative analysis.

The analysis is based on

- Brand Positioning of Leading companies

- Application

- Industry Collaborations

Dental Implants: Commercialization Activity

This segment of the report provides a detailed list of any commercial activity in the field of Dental Implants devices ranging from collaboration, mergers and acquisition, recent breakthrough among others.

Development Activities

- In September 2020, Global provider of advanced materials and additive manufacturing services, Henkel, collaborated with dental product manufacturer Keystone to scale up 3D printing solutions for the dental industry. The partnership will see Henkel add dental applications to its 3D printing portfolio, while Keystone will utilize the collaboration to increase its ongoing business in the sector.

- In November 2020, NYU College of Dentistry (NYU Dentistry) has received funding and in-kind support from Straumann Group North America, a global leader in tooth replacement and orthodontic solutions, to make dental implants more accessible for patients in need and to foster and enhance student education at NYU Dentistry.

Further commercial activities are provided in the report??..

?

Dental Implants: Reimbursement

- US

Original Medicare, Part A and Part B, does not cover dental implants (nor does it cover routine dental care). Some Medicare

Advantage plans may include routine dental services.

Further information is provided in the report??.

Report Highlights

- Extensive coverage of the Dental Implants under development
- The report reviews details of major pipeline products which includes, product description, licensing and collaboration details and other developmental activities
- The report reviews the major players involved in the development of Dental Implants and list all their pipeline projects
- The coverage of pipeline products based on various stages of development ranging from Early Development to Approved / Issued stage
- The report provides key clinical trial data of ongoing trials specific to pipeline products
- Recent developments in the segment / industry
- The report consists of in depth analysis of pipeline products based on various parameters

Dental Implants Report Insights

- Dental Implants - Pipeline Analysis
- Dental Implants - Unmet Need
- Dental Implants - Market Dynamics
- Dental Implants - Future Perspectives and Conclusion
- Dental Implants - Analyst Views

Key Questions

- What are significant companies in this segment, their information, analysis, and insights to improve R&D strategies?
- How to identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage?
- What are important and diverse types of Dental Implants under development?
- What are market-entry and market expansion strategies in Dental Implants?
- What are some of the mergers and acquisitions and to identify major players with the most promising pipeline?
- What is in-depth analysis of the product's current stage of development, territory and estimated launch date??

Key Players

- Avinent Implant System S.LU.
- Cortex Dental Implants Industries Ltd.
- Dentatus AB
- DENTSPLY SIRONA Inc.
- Envista Holdings Corp.

Table of Contents:

1. Key Insights
 2. Dental Implants: Snapshot
 3. Dental Implants
 - 3.1. Product Overview
 - 3.2. Regulatory Approvals based on Class
 - 3.3. Indications
 - 3.4. Mechanism
 4. Dental Implants: Competitive Assessment
 - 4.1. Assessment by Implant Type
 - 4.2. Assessment by Product Price
 - 4.3. Assessment by Material Type
 - 4.3.1. Titanium Dental Implants
 - 4.3.2. Zirconium Dental Implants
 - 4.4. Assessment by Company
 - 4.4.1. Nitium Technology Sdn Bhd
 - 4.4.1.1. NiTiDent Tuah Porous NiTi Dental Implants: Nitium Technology Sdn Bhd
 - 4.4.1.1.1. Product Information
 - 4.4.1.1.2. Research and Development
 - 4.4.1.1.3. Patent Details
 - 4.4.1.1.4. Regulatory Milestone
 - 4.4.2. Zimmer Biomet
 - 4.4.2.1. T3 short Dental Implant: Zimmer Biomet
 - 4.4.2.1.1. Product Information
 - 4.4.2.1.2. Research and Development
 - 4.4.2.1.3. Patent Details
 - 4.4.2.1.4. Regulatory Milestone
- *More Companies and products would be added in the final report
5. Dental Implants: Competitive Benchmarking : By Company
 - 5.1. Brand Positioning of Leading companies
 - 5.2. Analysis based on Application
 - 5.3. Analysis based on Industry Collaborations
6. Dental Implants - Commercialization Activity
