Report description:

KEY FINDINGS

The France recycled glass market is set to register a CAGR of 4.61% in terms of volume and 5.74% in terms of revenue during the forecast period, 2022-2028. The country has a thriving glass packaging market, facilitating growth opportunities for the market analyzed.

MARKET INSIGHTS

Glass is one of the most sought materials for packing food, perfumery, cosmetics, pharmaceuticals, and beverages. This is attributed to its excellent barrier properties, reusability, and sterility. France has been a dominant beverage producer in the European Union with an extensively cultivated environment that enables the development of different forms of indigenous alcohol and their associated premium packaging solutions, cognac and champagne. As per stats, cognac remained the leading French wine and spirit export, followed by champagne. Also, despite the country's wine exports decreasing by volume, the wine sector constitutes France's second-biggest trade surplus after its aeronautics industry. Additionally, France encompasses product innovations with regard to glass bottles.

Besides, the vendors in France are considerably investing and developing new products for pharmaceutical glass packaging to expand their production footprint. It is also evaluated as a conducive market for several pharmaceutical glass packaging companies to set up their manufacturing facilities.
