Report description:

Eyewear will continue to recover from the negative effects of the pandemic in 2022, seeing overall healthy single-digit volume and value growth. Despite the country continuing to be impacted by some restrictions at the start of the year, the reopening of foodservice venues and non-essential stores positively influenced shopping behaviours, with more consumers feeling more confident venturing outside of the home. Although eyewear is considered an essential product for the Dutch (with optical good...

Euromonitor International's Eyewear in Netherlands report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (2017-2021), allowing you to identify the sectors driving growth.
