Europe Performance Minerals Additives Market - Scope of Report

TMR's report on the performance minerals additives market in Europe studies the past as well as the current growth trends and opportunities to gain valuable insights of the indicators of the market during the forecast period from 2022 to 2031. The report provides revenue of the performance minerals additives market for the period 2017-2031, considering 2021 as the base year and 2031 as the forecast year. The report also provides the compound annual growth rate (CAGR %) of performance minerals additives market from 2022 to 2031.

The report has been prepared after an extensive research. Primary research involved bulk of the research efforts, wherein analysts carried out interviews with key opinion leaders, industry leaders, and opinion makers. Secondary research involved referring to key players' product literature, annual reports, press releases, and relevant documents to understand the performance minerals additives market in Europe.

Secondary research also included Internet sources, statistical data from government agencies, websites, and trade associations. Analysts employed a combination of top-down and bottom-up approaches to study various attributes of the performance minerals additives market in Europe.

The report includes an elaborate executive summary, along with a snapshot of the growth behavior of various segments included in the scope of the study. Moreover, the report throws light on the changing competitive dynamics in the performance minerals

additives market in Europe. These serve as valuable tools for existing market players as well as for entities interested in participating in the performance minerals additives market in Europe.

The report delves into the competitive landscape of the performance minerals additives market. Key players operating in the performance minerals additives market in Europe have been identified and each one of these has been profiled in terms of various attributes. Company overview, financial standings, recent developments, and SWOT are the attributes of players in the performance minerals additives market profiled in this report.

#### Research Methodology

The research methodology is a combination of exhaustive primary and secondary research to analyze the performance minerals additives market.

#### Secondary Research

Secondary research included a search of company literature, technical writing, patent data, Internet sources, and statistical data from government websites, trade associations, and agencies. This has proven to be the most reliable, effective, and successful approach for obtaining precise data, capturing industry participants' insights, and recognizing business opportunities.

Secondary research sources that we referred to include, but are not limited to:

Company websites, presentations, annual reports, white papers, technical papers, product brochures  
Internal and external proprietary databases and relevant patents  
National government documents, statistical databases, and market reports  
News articles, press releases, and webcasts specific to companies operating in the market

#### Specific Secondary Sources:

##### Industry Sources:

Veterinary Council of Europe  
European Federation of Animal Health  
Animal Welfare Board of Europe

##### Company Information

We conducted primary interviews with industry participants and commentators to validate data and analysis. A typical research interview fulfills the following functions:

Provides first-hand information on market size, market trends, growth trends, competitive landscape, outlook, etc.

Helps in validating and strengthening secondary research findings

Develops the analysis team's expertise and market understanding

Primary research involves e-mail interactions, telephonic interviews, as well as face-to-face interviews for each market, category, segment, and sub-segment across geographies

Participants who took part in the process include, but are not limited to:

Industry participants: Marketing/product managers, market intelligence managers, and regional sales managers

Purchasing/sourcing managers, technical personnel, distributors

Outside experts: Investment bankers, valuation experts, and research analysts

Key opinion leaders specializing in the market with respect to different industry verticals

Primary participants included, but are not limited to:

Bayer AG

Elanco Products Company

Merck & Co., Inc.

Ceva Sante Animale

Virbac SA

Data Triangulation: Information culled from "Secondary & Primary Sources" is cross-checked with "TMR Knowledge Repository", which is updated every quarter

Market Estimation: Market size estimations involved an in-depth study of product features, technology updates, geographic presence, product demand, sales data (value or volume), historical year-on-year growth, and others. Other approaches were also utilized to derive market size and forecasts. Where no hard data was available, we used modeling techniques in order to produce comprehensive datasets. A rigorous methodology has been adopted, wherein the available hard data are cross-referenced with the following data types to produce estimates:

Demographic Data: Population, inflation rates, and others

Industry Indicators: Production data, R&D investment, technology stage, and infrastructure, sector growth, and facilities

Market Forecasting: Market forecasts for various segments are derived by taking into account drivers, restraints/challenges, opportunities prevailing in the market, and considering advantages/disadvantages of segments/sub-segments over other segments/sub-segments. Business environment, historical sales pattern, unmet needs, competitive intensity, and country-wise consumption data are the other pivotal factors considered to derive market forecasts.
