Chemicals Market Summary, Competitive Analysis and Forecast, 2017-2026

#### Summary

Global Chemicals industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

#### Key Highlights

- The chemicals market consists of speciality chemicals, commodity chemicals, agricultural chemicals, and other chemicals (which include products such as pharmaceutical chemicals).
- Market values are taken as the country's consumption of chemical products at producer selling price (PSP).
- All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2021 annual average exchange rates.
- The market is built by capturing information at the national level for each country covered, primarily through government and ministry reports. Forecasts are based partly on projections for key indicators and drivers of the chemical industry, and these are correlated against historic data and used to predict output over a five year time horizon.
- The global chemicals market had total revenues of \$4,739.1 billion in 2021, representing a compound annual growth rate (CAGR) of 2.7% between 2016 and 2021.
- The commodity chemicals segment accounted for the largest proportion of the market in 2021, with total revenues of \$2,377.0 billion, equivalent to 50.2% of the market's overall value.
- The Asia-Pacific region is the largest globally and had a 59.2% share of the global chemicals market's total value in 2021, the majority of which (64.3%) is accounted for by China.
