Construction Market Summary, Competitive Analysis and Forecast, 2017-2026

Summary

Global Construction industry profile provides top-line qualitative and quantitative summary information including: Industry size (value 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the Industry.

Key Highlights

- The construction market is defined as the value of work put in place annually for both, residential and non-residential construction.
- The non-residential construction market includes five key construction sectors: commercial & leisure, energy & utilities, industrial, infrastructure, and institutional.
- The residential construction market is defined as the value of work put in place annually for residential buildings.
- Market value is defined as the output value of construction activity in any given time period, including costs related to construction materials, equipment and services in new construction, refurbishment, repair and maintenance and demolition.
- All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2021 annual average exchange rates.
- Forecasts are based partly on projections for key indicators and drivers of construction activity, and these are correlated against historic data and used to predict output over a five-year time horizon. Adjustments are made based on a range of factors, including government investment programs, major upcoming events and developments relating to projects.
- The global Construction industry had total revenues of \$12,845.9bn in 2021, representing a compound annual growth rate (CAGR) of 5.8% between 2016 and 2021.
- The Non-Residential Construction segment was the industry's most lucrative in 2021, with total revenues of \$7,519.6bn,
