Report description:

Imaging devices overall continues to plunge in volume terms in 2022, with digital cameras plummeting more dramatically than digital camcorders in a pattern that has persisted for the last ten years. The rise of smartphones with advanced camera lenses and video recording properties is largely responsible, as such products perfectly satisfy the photography needs of most consumers. The result is that products within imaging devices are increasingly niche to professional photographers or those follo...

Euromonitor International's Imaging Devices in Turkey report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, distribution or pricing issues. Forecasts illustrate how the market is set to change.
