Report description:

Mobile phones overall is showing a decline in volume sales in 2022, though current value sales are rising, driven by growth in smartphones. Higher unit prices are the result of global supply chain constraints, component shortages and inflationary pressures, with the first two also impacting volume sales. Saturation is another contributing factor to falling volume sales. Sales of feature phones continue to decline in both volume and current value terms largely because such products are no longer...

Euromonitor International's Mobile Phones in Turkey report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level.
