### **Report description:**

#### KEY FINDINGS

The Indonesia home insecticides market is projected to register a CAGR of 6.37% during the forecast period, 2022-2028. The prevailing vector-borne diseases, the growing urbanization, and the presence of multiple distribution channels propel market growth.

#### MARKET INSIGHTS

Indonesia is a tropical country, classified as a lower-middle income country by World Bank. Vector-borne diseases are caused by bacteria, viruses, and parasites transmitted by vectors. These are found in subtropical and tropical regions, thereby largely affecting the poor population. In addition, the region encompasses schistosomiasis, Japanese encephalitis, filariasis, chikungunya, dengue, malaria, etc. Such aspects have increased the need for home insecticide as a precautionary measure against varied diseases.

Further, the Indonesia home insecticides market segmentation includes distribution channel and home insecticide type. The distribution channel segment includes convenience stores that are small retail establishments that operate near residential neighborhoods or busy commercial areas. Also, they are found near highways, shopping malls, gas stations, etc. Such stores enable a larger reach for brands and are beneficial to home insecticide providers. Alfamart and Indomaret are among the largest convenience store chains in the country.

#### COMPETITIVE INSIGHTS

Some of the leading firms in the market are Megasari Makmur Pt (Godrej Indonesia), Fumakilla Indonesia Pt, Johnson Home Hygiene Products Pt, etc.
