Report description:

Saudi Arabia In Vitro Diagnostics market is anticipated to grow at a formidable rate in the forecast period, 2023-2027. The rising awareness among the consumers about the benefits of early healthcare diagnostics and preventive practices and the growing healthcare industry are the primary drivers for the Saudi Arabia In Vitro Diagnostics market. With the availability of high-quality healthcare services, consumers are able to avail expert medical care for obesity, cardiovascular diseases, asthma, and other conditions, which is creating more demand for diagnosis. The government offers all its citizens free public healthcare services because it is recognized as a "right" of its citizens. Insurance coverage is also given to those employed in the private sector to make healthcare services accessible to all the Saudi residents. Every year, a large number of pilgrims travel to Makkah to visit the Holy Mosque, and the government offers free medical care at its Ministry of Health (MOH) facilities to tourists. To ensure that all resident citizens have access to high-quality services, medical test and diagnosis facilities, and government authorities, reimbursement facilities are offered to patients who utilize healthcare sector benefits. Besides, market players are making huge investments to expand their product portfolio and services.

Saudi Arabia In vitro diagnostics market is segmented on the basis of product, technology, application, end user, regional distribution, and company. Based on the product, the market is divided into instruments, reagents, software & services. Reagents

are expected to hold the largest market share in the forecast period, 2023-2027. The availability of a wide variety of reagents and the demand for accurate, expedient, and quick diagnosis of genetic disorders and chronic diseases in their early stages are driving the segment demand.

Major market players operating in the Saudi Arabia In Vitro diagnostics market are Altona Diagnostics GmbH, Beckman Coulter, Inc., Siemens Healthineers AG, OncoDNA SA, Vela Diagnostics (Nile Science Corporation), Abbott Laboratories, Inc., Becton, Dickinson, and Company, F. Hoffmann-La Roche AG, Thermo Fischer Scientific, Inc., Sysmex Corporation.

Years considered for this report:

Historical Years: 2017-2020

Base Year: 2021

Estimated Year: 2022

Forecast Period: 2023-2027

Objective of the Study:

- To analyze the historical growth in the market size of the In Vitro Diagnostics from 2017 to 2021.
- To estimate and forecast the market size of In Vitro Diagnostics market from 2023 to 2027 and growth rate until 2027.
- To classify and forecast the In Vitro Diagnostics market based on product, technology, application, end user, region, and company.
- To identify the dominant region or segment in the In Vitro Diagnostics market.
- To identify drivers and challenges for the In Vitro Diagnostics market.
- To examine competitive developments such as expansions, new product launches, mergers & acquisitions, etc., in the In Vitro Diagnostics market.
- To identify and analyze the profiles of leading players operating in the In Vitro Diagnostics market.
- To identify key sustainable strategies adopted by market players in In Vitro Diagnostics market.

TechSci Research performed both primary as well as exhaustive secondary research for this study. Initially, TechSci Research sourced a list of service providers across the country. Subsequently, TechSci Research conducted primary research surveys with the identified companies. While interviewing, the respondents were also enquired about their competitors. Through this technique, TechSci Research could include the service providers who could not be identified due to the limitations of secondary research. TechSci Research analyzed the presence of all major players across the country.

TechSci Research calculated the market size of the In Vitro Diagnostics market using a top-down approach, wherein data for various end-user segments was recorded and forecast for the future years. TechSci Research sourced these values from the industry experts and company representatives and externally validated through analyzing historical data of these products and applications for getting an appropriate, overall market size. Various secondary sources such as company websites, news articles, press releases, company annual reports, investor presentations and financial reports were also studied by TechSci Research.

Key Target Audience:

- Market research and consulting firms
- Government bodies such as regulating authorities and policy makers
- Organizations, forums, and alliances

The study is useful in providing answers to several critical questions that are important for the industry stakeholders such as service providers, end users, etc., besides allowing them in strategizing investments and capitalizing on market opportunities.

Report Scope:

In this report, Saudi Arabia In Vitro Diagnostics market has been segmented into following categories, in addition to the industry trends which have also been detailed below:

-□ Saudi Arabia In Vitro Diagnostics Market, By Product:

- o□ Instruments
- o□ Reagents
- o□ Software & Services

-□ Saudi Arabia In Vitro Diagnostics Market, By Technology:

- o□ Immunoassay
