### **Report description:**

Sticking plasters/adhesive bandages, as well as gauze, tape and other wound care, followed their pre-pandemic pattern in 2022. According to industry sources, sticking plasters did not benefit from COVID-19 vaccinations as they were not used in the process. Nevertheless, product demand increased as, with the easing of pandemic restrictions, Colombians were spending more time outside of their homes, including taking part in various sporting activities, which increases the risk of injuries.
