**Report description:**

The global multichannel order management market size is expected to grow at a Compound Annual Growth Rate (CAGR) of 9.4% during the forecast period, to reach USD 4.2 billion by 2027 from USD 2.7 billion in 2022. Marketplaces, social media platforms, and online websites have all seen an increase in popularity as a result of expanding digitization activities in multichannel order management, it is anticipated that such developments would help the multichannel order management market to grow rapidly. Due to an unforeseen increase in demand from numerous platforms and changing organizational structures, multichannel order management has proven difficult for businesses and their customers. In order to manage orders originating from various channels, cutting-edge multichannel order management software and services are being deployed.

The major market players such as include IBM, SAP, HCL Technologies, Oracle, and Salesforce, have adopted numerous growth strategies, which include acquisitions, new product launches, product enhancements, and business expansions, to enhance their market shares.

Based on deployment mode, cloud deployment mode to register for the largest market size during the forecast period

The cloud-based multichannel order management deployment mode is an economical and effective approach for enterprises to handle large data concerns. Organizations can lower their infrastructure costs due to the pay-per-use pricing structure of cloud solutions. Due to the fact that no data must be stored on-premises, both the original investment and ongoing maintenance costs for these solutions are drastically reduced. The cloud deployment mode is anticipated to register the largest market size and is projected to grow from USD 1,182 million to USD 1,752 million during the forecast period.
