Report description:

In 2020, due to COVID-19, long periods of isolation allowed mothers to stay at home with their babies during the day, which increased the occasions for breastfeeding, competing with packaged baby food, which traditionally offers convenience in terms of fulfilling nutritional needs when mothers are outside of the home, including for work commitments. Although breastfeeding is for a limited period for most mothers, who tend to migrate towards milk formula before the first full year of a baby's life...
