Report description:

Baby food is expected to register an increase in current value sales, though volume sales are expected to fall. Two factors are leading to the weak performance. A declining birth rate is negatively impacting demand. In addition, high inflation caused by in particular increased fuel prices due to the war in Ukraine, as well as currency devaluation of the Egyptian pound, has led to price rises. This is especially true for imported brands. As a result, players have raised prices in small but freque...

Euromonitor International's Baby Food in Egypt report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2017-2021, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth. How key trends such as health and wellness, sustainability and recovery from the pandemic are shaping the market in <|Year|> directly informs our forecasts to 2026, clearly indicating how the market is expected to change.
