Report description:

Motion sickness remedies have seen the strongest growth in sales in digestive remedies in 2022. As COVID-19 related restrictions were removed, people started to travel again and the incidence of motion sickness rose considerably. The category has continued with its strong recovery after the marked fall in sales in 2020 and is expected to go on attracting more and more consumers as they indulge the pent-up demand for travel resulting from the extended period of home seclusion during the pandemic.
