- Enterprise Price \$5000.00

Report description:

The North America dental scalers market is expected to grow from US\$ 460.14 million in 2022 to US\$ 646.44 million by 2028; it is estimated to grow at a CAGR of 5.8% from 2022 to 2028.

Awareness about oral health is spread across North America through various initiatives. For instance, World Oral Health Day is observed every year on March 20. It highlights the benefits of good oral health, spreads awareness about oral diseases, and promotes oral hygiene maintenance. The theme for 2019 World Oral Health Day was "Say Ahh: Act on Mouth Health." This campaign helped raise awareness among people about taking concrete actions to prevent oral diseases and safeguard their overall health. The campaign focused on, both, individuals and oral health professionals, as the latter are also responsible for educating and protecting patients from oral diseases. Further, policymakers are aiming to lower the burden of oral diseases and integrate oral health into policies that address other diseases. The Department of Health and Human Services (HHS), US, is currently supporting a broad spectrum of oral health activities that focus on oral health financing, research, workforce development, public health action, quality initiatives, and technology. The USPHS Oral Health Coordinating Committee is compiling a summary of activities that captures the breadth and diversity of efforts within HHS to support oral healthcare.

Vendors in the dental scalars market can attract new customers and expand their footprints in emerging markets by offering products with new features and technologies. This factor is likely to drive the North America dental scalars market at a good CAGR during the forecast period.
