- Enterprise Price \$5000.00

Report description:

The SAM dental scalers market is expected to grow from US\$ 37.86 million in 2022 to US\$ 54.75 million by 2028; it is estimated to grow at a CAGR of 6.3% from 2022 to 2028.

Awareness about oral health is spread across the region through various initiatives. For instance, World Oral Health Day is observed every year on March 20. It highlights the benefits of good oral health, spreads awareness about oral diseases, and promotes oral hygiene maintenance. The 2019 World Oral Health Day theme was 'Say Ahh: Act on Mouth Health.' This campaign helped raise awareness among people about taking concrete actions to prevent oral disease and safeguard their overall health. The theme not only focused on individuals but also on the oral health professionals, as they too are stakeholders in educating and protecting patients from oral diseases. Policymakers are also aiming to address oral diseases' burden and integrate oral health into policies that address other diseases. The governments of various countries are also focusing on creating awareness about oral health among their people. Several initiatives by government and institutions for creating awareness about oral health among the people are driving the dental scalers market across the region.

With the new features and technologies, vendors can attract new customers and expand their footprints in emerging markets. This factor is likely to drive the SAM dental scalers market. The SAM dental scalers market is expected to grow at a good CAGR during the forecast period.
