Report description:

In March 2022 in French airports traffic levels were just below two thirds of those of observed in the same month of 2019 - which represents an improvement on January's figures and a return to levels close to those seen at the end of 2021. This uptick was something of a surprise as March marked the beginning of the war in Ukraine. Domestic traffic is seeing the strongest recovery in 2022, though international traffic is also improving, with dramatically improved growth being recorded for Africa...

Euromonitor International's Airlines in France report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest market size data 2017-2021, allowing you to identify the sectors driving growth. It identifies the leading companies and offers strategic analysis of key factors influencing the market - be they new legislative, technology or pricing issues.
