Report description:

In South Africa, mobility continues to recover after a turbulent period. New car sales are rebounding, as interest rates remain low and the supply of semiconductors eases, while electric vehicles are gaining traction. Ride hailing giants Bolt and Uber have benefited from the ceasing of lockdowns, and continue to expand their offerings. The government has announced the pilot of an integrated ticketing system pilot for public transport, while preparing legislation for the arrival of autonomous veh...

Euromonitor International's Mobility in South Africa report offers a comprehensive guide of the traditional and newly emerging mobility forms. The report is broken down into five key areas of industry research: automotive sales and ownership, electric and alternative fuel vehicles, shared mobility, public transport, and autonomous vehicles and connectivity. It provides the latest automotive sales and registration and shared mobility data over 2015-2020, allowing you to identify the sectors driving growth. It assesses the strategic analysis of key factors influencing the market - be they legislative, consumer lifestyle or economic. Forecasts in the reports are available to 2025.

Product coverage: Car Traffic Volume, Distances Travelled by Mode of Transport, Electric Charging Stations, Fuel Prices, Light Vehicle Sales, Shared Mobility, Vehicle Production, Vehicle Registrations, Vehicles in Use.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

- * Get a detailed picture of the Mobility market;
- * Pinpoint growth sectors and identify factors driving change;
- * Understand the competitive environment, the market's major players and leading brands;
- * Use five-year forecasts to assess how the market is predicted to develop.
