Report description:

Paediatric consumer health is underdeveloped in Kazakhstan. The assortment of such products available in the country is relatively narrow, and interest in most categories remains low. This is partly because parents are often content to give their kids standard (ie adult) OTC medications that are marketed as also being suitable for children. Given relatively low income levels and comparatively high prices for paediatric products, this preference is as much due to economic necessity as it is to tr...

Euromonitor International's Paediatric Consumer Health in Kazakhstan report offers a comprehensive guide to the size and shape of the market at a national level.
