### **Report description:**

Cooking ingredients and meals are expected to register high current value growth, though volume growth will be much more moderate. Global inflationary pressures, mainly due to the war in Ukraine, which has caused an energy crisis as well as shortages in products such as edible oils, are feeding into higher retail prices and dampening volume demand somewhat. All the same, a rebound in oil prices is benefitting the economy and protecting Algerian consumers to a degree.

Euromonitor International's Cooking Ingredients and Meals in Algeria report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2017-2021, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth.
