- Site Price \$4000.00
- Enterprise Price \$5000.00

**Report description:**

The band saw blades market in Middle East & Africa is expected to grow from US\$ 104.46 million in 2022 to US\$ 114.67 million by 2028; it is estimated to grow at a CAGR of 1.6% from 2022 to 2028.

Band saw blades find major applications in the woodworking and metalworking industries, owing to the growing demand for coarse tooth blades (2 or 3 TPI) for resawing and cutting thicker materials and diamond blades or ferrous blades for metal-cutting. Important processes in the woodworking industry include harvesting and processing of wood and other forest resources, logging, woodworking, and pulp and paper processing. Enterprises in the industry produce finished products used by the construction, agriculture, and food industries. Band saw blades are used to carry out primary wood processing. Advancements in the metal processing techniques have augmented the needs for equipment and tools that dampen vibration and noise. Comfort and ease of handling the equipment are an important consideration in metal processing. Therefore, there is an increased demand for durable band saw blades with longevity to prevent failure and downtime. Rise in the CNC machine manufacturing process bolsters the growth of the industrial metalworking industry. The advent of CNC technology, technological advancements, and innovative developments of products, and increasing demand for power tools and robotic woodworking machines are among the other factors fueling the growth of the band saw blades market. In addition, rising proliferation of advanced technologies propels the sales of band saw blades in wood and metal work industries. Market players with extensive experience in the woodworking industry are working closely with woodworking companies to develop, modernize, and automate their products and implement systems to check product quality and production diagnostics. The industry for the furniture segment witnesses a significant growth. South Africa is one of the major exporters of forest-related products, including pulp, paper, and solid wood. Presence of

several forestry companies, as well as thousands of commercial timber and small-scale farmers, represent over 90% of South Africa's forestry industry. Thus, the country is witnessing increasing demands for band saw blades to process raw logs into primary, secondary, and tertiary wood products for home consumption and export. As a result, the regional woodworking industry players are upgrading their existing machineries to add value to their wood products. Furthermore, the woodworking & metalworking industry is characterized by the increasing activities of R&D by major players, development of advanced machines, and technological up-gradation of current products, which creates demand for band saw blades. In addition, the growing use of IoT in woodworking machines to enable communication between objects and internet-enabled devices propels the growth of the band saw blades market.

#### Middle East & Africa Band Saw Blades Market Revenue and Forecast to 2028 (US\$ Million)

#### Middle East & Africa Band Saw Blades Market Segmentation

The Middle East & Africa band saw blades market is segmented by TPI, material, application, and country. Based on TPI, the band saw blades market can be segment into Less Than 3 TPI, 4 TPI to 6 TPI, and more than 7 TPI. The more than 7 TPI segment dominated the market in 2022. Based on material, the Middle East & Africa band saw blades market is categorized into Bi-metal, carbon steel, and others. The Bi-metal segment dominated the market in 2022. Based on application, the Middle East & Africa band saw blades market categorized into wood cutting and meat processing. The meat processing segment dominated the market in 2022. Based on country, the Middle East & Africa band saw blades market is segmented into South Africa, Saudi Arabia, the UAE, and the rest of Middle East & Africa. Further, South Africa dominated the market in 2022.

A few of the key players dominating the Middle East & Africa band saw blades market are BAHCO (SNA Europe), Friedrich Bickenbach GmbH & Co. KG, KYOCERA UNIMERCO, L. S. Starrett Company, LENOX, and NACHI FUJIKOSHI CORP.

- 5.1 Market Drivers
  - 5.1.1 Increase in woodworking and metalworking processes
  - 5.1.2 Growing demand for high-speed bi-metal band saw blades
- 5.2 Market Restraints
  - 5.2.1 High cost of maintenance of band saw blade
- 5.3 Market Opportunities
  - 5.3.1 Expansion of construction projects in the developing economies
- 5.4 Future Trends
  - 5.4.1 Development of advanced coating materials to increase bandsaw blade performance
- 5.5 Impact Analysis of Drivers and Restraints
- 6. Band Saw Blades Market - MEA Analysis
  - 6.1 MEA Band Saw Blades Market Overview
  - 6.2 MEA Band Saw Blades Market Forecast and Analysis
- 7. MEA Band Saw Blades Market- by TPI
  - 7.1 Overview
  - 7.2 MEA Band Saw Blades Market, By TPI (2021 And 2028)
  - 7.3 Less Than 3 TPI
    - 7.3.1 Overview
