Report description:

Asia Pacific is set to remain the fastest-growing region, led by major developing economies such as China, India and Indonesia. The region is set to benefit from economic reforms and transformation, strong manufacturing, exports and foreign investments, improving intraregional cooperation, as well as growing consumer bases and incomes. However, the near-term outlook is dimmed by weakening global demand, surging inflation, monetary tightening and spillover effects from China's slowdown.

Strategy Briefings offer unique insight into emerging trends world-wide. Aimed squarely at strategists and planners, they draw on Euromonitor International's vast information resources to give top line insight across markets and within consumer segments. Written by some of our most experienced analysts, they are designed as provocations for senior management to use in their own forum, allowing them to stand back and reflect on the behaviour and motivation driving global markets today and tomorrow
