

**Immunodiagnosics Market Forecast to 2028 - COVID-19 Impact and Global Analysis
By Product [Enzyme-Linked Immunosorbent Assays (ELISA), Chemiluminescence
Immunoassays (CLIA), Radioimmunoassays (RIA), and Others], By Clinical Indication
(Infectious Diseases, Hepatitis+HIV, Endocrinology, Gastrointestinal, Metabolics, and
Others), By End User (Hospitals, Clinics, Diagnostic Laboratories, Academic and
Research Institutes, and Others), and Geography**

- Enterprise Price \$8550.00

Report description:

The immunodiagnostic market is expected to grow from US\$ 17,948.62 million in 2021 to US\$ 29,526.72 million by 2028; it is estimated to grow at a CAGR of 7.4% from 2022 to 2028.

The increasing prevalence of infectious diseases and the growing use of point-of-care immunodiagnosics are the factors fueling the global immunodiagnostic market growth. However, factors such as inadequate treatment reimbursement scenarios are restraining the market growth.

Immunodiagnosics is a diagnostic methodology that primarily uses antigen-antibody reaction as its primary means of detection. Antibodies, specific for the desired antigen, can be conjugated with a radiolabel, fluorescent label, or color-forming enzyme and are used as a probe to detect it. The speed, accuracy, and simplicity of such tests have led to the development of rapid techniques for the diagnosis of diseases, microbes

Point-of-care testing (POCT) has become critical to patient-centric healthcare due to the need for rapid diagnostic results to

www.scott's-international.com

determine accurate and faster treatment. A shift from centralized point-of-care testing to decentralized testing for chronic and infectious patients has resulted in convenient patient access to these diagnostics. The current approach to diagnosis and monitoring chronic conditions or detecting pathogens such as bacteria and viruses rely on immunoassay testing.

Advanced point-of-care devices enable rapid screening of up to three components from a single sample. Also, the point-of-care diagnostics (POCD) inclined toward mobile healthcare (mH) smart devices could revolutionize personalized healthcare monitoring and management, paving the way for next-generation POCTs. The infectious disease management can be significantly improved by POCTs, especially in developing countries where access to timely medical care is challenging and healthcare infrastructure is outdated and sparse. Additionally, the technologically developed diagnostic kits leading to fewer manual errors propel the immunodiagnosics market.

Innovative immunodiagnostic products are being developed by several market players. For instance, Thermo Fisher Scientific has developed immunodiagnostic products such as enzyme-linked immunoassay (ELISA) reagents and buffers, antibodies and detection probes, linking mechanisms, blocking buffers and detergents, detection substrates, and capture surfaces, along with services such as bioconjugation and detection. Further, on September 1, 2020, Roche launched SARS-CoV-2 Rapid Antigen Test. The Test is used in POC settings for symptomatic and asymptomatic people to help healthcare professionals identify the infection within 15 minutes.

The COVID-19 pandemic boosted the use of immunodiagnosics. According to the American Society for Clinical Pathology, in March 2020, the Cepheid Xpert Xpress SARS-CoV-2 test became the first POC COVID-19 detection assay to receive Emergency Use Authorization (EUA) from the US Food and Drug Administration (FDA).

Moreover, in oncology, an immunodiagnostic test can confirm the presence of a solid tumor by detecting known tumor-associated antigens or antibodies. Thus, the rising use of immunodiagnosics in cancer treatment is driving the immunodiagnosics market.

Product-Based Insights

Based on product, the immunodiagnosics market is segmented into enzyme-linked immunosorbent assays (ELISA), chemiluminescence immunoassays (CLIA), radioimmunoassays (RIA), and others. The enzyme-linked immunosorbent assays (ELISA) segment held the largest market share of US\$ 9,980.87 million in 2021. On the other hand, chemiluminescence immunoassays (CLIA) is expected to witness the highest growth during the forecast period.

Clinical Indication-Based Insights

Based on clinical indication, the immunodiagnosics market is segmented into infectious diseases, hepatitis+HIV, endocrinology, gastrointestinal, metabolics, and others. The infectious diseases segment accounted for the largest share of the market in 2021, and it is expected to register the highest CAGR of 8.0% during the forecast period.

End User-Based Insights

Based on end user, the immunodiagnosics market is segmented into hospitals, clinics, diagnostics laboratories, academic and research institutes, and others. The hospitals segment held the largest share of the market in 2021. However, the clinics segment accounts for a CAGR of 8.5% during the forecast period.

A few of the major primary and secondary sources referred to while preparing the report on the immunodiagnosics market are the World Health Organization (WHO), the US Census Bureau, and the US National Library of Medicine, among others.

TABLE OF CONTENTS

1. Introduction
 - 1.1 Study Scope
 - 1.2 The Insight Partners Research Report Guidance
 - 1.3 Market Segmentation
 - 1.3.1 Global Immunodiagnosics Market - By Product
 - 1.3.2 Global Immunodiagnosics Market - By Clinical Indication
 - 1.3.3 Global Immunodiagnosics Market - By End User
 - 1.3.4 Global Immunodiagnosics Market- By Geography
2. Global Immunodiagnosics Market - Key Takeaways
3. Research Methodology
 - 3.1 Coverage
 - 3.2 Secondary Research
 - 3.3 Primary Research
4. Immunodiagnosics Market- Market Landscape
 - 4.1 Overview
 - 4.2 PEST Analysis
 - 4.2.1 North America - PEST Analysis
 - 4.2.2 Europe - PEST Analysis
 - 4.2.3 Asia Pacific - PEST Analysis
 - 4.2.4 Middle East & Africa - PEST Analysis
 - 4.2.5 South & Central America - PEST Analysis
 - 4.3 Experts Opinion
5. Immunodiagnosics Market - Key Market Dynamics
 - 5.1 Market Drivers
 - 5.1.1 Increasing Prevalence of Infectious Diseases
 - 5.1.2 Growing Use of Point-of-Care Immunodiagnosics
 - 5.2 Market Restraints
 - 5.2.1 Inadequate Reimbursement Scenario
 - 5.3 Market Opportunities
 - 5.3.1 Rising Focus on R&D Investment and Expansion by Key Players
 - 5.4 Future Trends
 - 5.4.1 Technological Advancements in Immunodiagnosics
 - 5.5 Impact Analysis
6. Immunodiagnosics Market- Global Analysis
 - 6.1 Global Immunodiagnosics Market Revenue Forecast and Analysis
 - 6.2 Global Immunodiagnosics Market, By Geography - Forecast and Analysis
 - 6.3 Market Positioning of Key Players
 - 6.4 Global Immunodiagnosics Market - Market Potential Analysis, By Region
 - 6.5 Comparative Company Analysis
 - 6.6 Growth Strategy Analysis
 - 6.7 Performance of Key Players
 - 6.7.1 Abbott Laboratories
 - 6.7.1.1 F. Hoffmann-La Roche Ltd
7. Immunodiagnosics Market Analysis - by Product
