#### Key Highlights

- The marine freight sector is defined as consisting of revenues generated from freight transportation by ship of container (only LoLo) and dry bulk cargo, by sea- and ocean-going vessels. The sector includes both domestic and international freight, which for the purposes of this report is counted in the country of origin. The values are calculated by multiplying the average price of the goods per ton of volume of cargo transported. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2021 annual average exchange rates.
- The German marine freight industry had total revenues of \$11.5 billion in 2021, representing a compound annual growth rate (CAGR) of 2.7% between 2016 and 2021.
- The containerized segment was the industry's most lucrative in 2021, with total revenues of \$7.1 billion, equivalent to 61.2% of the industry's overall value.
- The maritime industry is one of the most important sectors of the German economy. According to the European Maritime Transport Environmental Report 2021, it carries 77% of the external trade and 35% of the intra-European trade.
