### **Report description:**

Prior to the outbreak of COVID-19 sales of breakfast cereals had been in period of stagnation. However, with consumers facing home seclusion for long periods during 2020 this provided an unexpected boost to sales. With consumers switching to working and studying from home they also had more time to eat breakfast cereals in the morning, with these products also providing a convenient option for busy parents. This upturn in fortunes was short lived however as COVID-19 restrictions were eased in 20...
