Report description:

Energy drinks registered low levels of retail volume growth in 2022 amidst renewed consumer demand as lifestyles shifted back to greater normality after the COVID-19 pandemic. Inflation accelerated in early 2022 which has led to rising retail unit prices and translated into strong off-trade current value growth. Thanks to these factors, energy drinks is approaching pre-pandemic sales levels with both regular energy drinks and reduced sugar versions seeing a positive performance.

Euromonitor International's Energy Drinks in Bosnia and Herzegovina report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (2017-2021), allowing you to identify the sectors driving growth.
