### **Report description:**

Hot drinks sales achieved steady growth in 2022. While the largest category coffee performed best, growth was not as strong as had been expected. In addition to category maturity, sales were also hampered by significant global price hikes. Economic uncertainty, rising inflation and the war in Ukraine had an impact on consumer spending power. Nevertheless, sales are being supported for drinks that can be prepared quickly, especially among the middle class, while distribution is also widening.
