Report description:

Retail value sales of hot drinks are set to record double-digit growth in 2022. However, this reflects record price inflation, with volume sales remaining stagnant during the year. Overall, increases in the cost of raw materials, shipping costs, labour wages and energy have led to substantial price increases in all hot drinks categories. As a result, more Czech households have been economising in 2022, and reducing their consumption of hot drinks in foodservice establishments.
