Report description:

In 2022 fresh vegetables is positing positive growth in retail volume sales following a decline in 2021. Fresh vegetables benefit from health positioning as a strong selling point, and in recent years, consumers have become increasingly conscious of the importance of adopting a healthy diet. This is fuelling not only higher demand for fresh snacks and more specifically fresh vegetables, but the need for cleaner, more natural products produced locally and, ideally, organic. Local foods are associ...

Euromonitor International's Vegetables in Spain report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data in volume terms 2017-2021, allowing you to identify the sectors driving growth.
