Global Diabetes Management Market Analysis and Forecast 2019-2028

Market Introduction

The global diabetes management market is expected to witness a strong growth rate of 8.4% during the forecast period of 2022-2028. The growth of the global diabetes management market is attributed to the rising incidence of diabetes among the younger as well as the geriatric population. Moreover, disease like obesity and the prevalence of junk food and alcohol among the younger population is expected to escalate the number of diabetic patients across the globe, which in turn will fuel the growth of the diabetes management market. In addition, the continuous R&D in the healthcare sector along with the introduction of innovative devices gives a thrust to the global diabetes management devices. Moreover, the higher incidences of diabetes (Type I & Type II) in the geriatric population across the globe are high which is increasing the demand for devices such as insulin pens and pumps and hence drives the growth of the diabetes management devices market.

Market Segmentation

The global diabetes management market is segmented on the basis of device type, end-user, distribution channel, and region. Based on device type, the market is divided into blood glucose monitoring devices and insulin delivery devices. Further, blood glucose monitoring device is divided into, self-monitoring devices and continuous glucose monitoring devices, and continuous glucose monitoring device are segmented into insulin pens, insulin pumps, insulin syringes, and others including jet injectors. On the basis of end-user, the market is segmented into diagnostics centers, hospitals, and home care. Based on the distribution channel, the market is segmented into retail pharmacies, hospital pharmacies, diabetes centres/clinics, and E-commerce websites. Based on region, the market is divided into North America, Latin America, Western Europe, Eastern Europe, Asia Pacific, and Middle East & Africa. Further, North America is divided into US and Canada.
