Report description:

The architectural glass market is projected to grow from US\$ 52,608.27 million in 2022 to US\$ 75,837.41 million by 2028; it is expected to grow at a CAGR of 5.6% from 2022 to 2028.

There is an increasing demand for glass from the construction industry as glass allows innovative designs, and it can be treated to improve insulation and energy efficiency. Large glass envelopes have become very common, especially in urban areas. In addition, glass is highly used in commercial buildings, owing to its special features and advantages such as aesthetics, physical properties, sustainability and energy efficiency, and weather resistance. Further, growing construction industry and rising need for energy-efficient products are boosting the demand for architectural glass. Various governments across the globe are focusing on making buildings more energy efficient. All these factors are contributing to the growth of the global architectural glass market.

Moreover, the growing investment in modernized infrastructure is propelling the market growth as glass gives a modern finish to construction. Additionally, increasing population and rising spending on construction are major drivers for construction and infrastructure redevelopment activities. Governments of different countries are also giving a massive push to the construction & infrastructure sector. For instance, in 2020, the Government of India allocated US\$ 130.57 billion to enhance the infrastructure sector in the country and announced US\$ 9.85 billion to the Ministry of Housing and Urban Affairs. Such government initiatives to enhance the construction & infrastructure sector are fueling the demand for architectural glass, which is further expected to drive

the global market.

In 2021, Asia Pacific held the largest revenue share of the global architectural glass market. In Asia Pacific, the rise in awareness regarding energy-efficient glass for construction applications and new developments in the solar industry are expected to boost the demand for glass in the coming years. The photovoltaic (PV) modules used in solar applications are incorporated with architectural laminated glass cover plates. Therefore, growing real estate industry, rising investments in the construction sector, and growing sustainable construction in the region are anticipated to boost the demand for architectural glass during the forecast period.

The beneficial government policies related to residential properties in several developing countries of Asia Pacific have propelled urbanization. For instance, according to the report by the Department for Promotion of Industry and Internal Trade (DPIIT), the government of India has planned to boost the infrastructure and construction services through several policies such as open FDI norms, large budget allocation to the infrastructure sector, and smart cities mission. Such factors are expected to drive the architectural glass market in the region.

AGC Inc, Compagnie de Saint-Gobain SA, Guardian Industries Holdings LLC, Nippon Sheet Glass Co Ltd, Qingdao Morn Building Materials Co Ltd, Asahi India Glass Ltd, Turkiye Sise ve Cam Fabrikalari AS, Schott AG, Jinjing (Group) Co Ltd, and Vitro SAB de CV. are among the major players operating in the global architectural glass market. Market players continuously focus on strategic development initiatives such as research and development, merger & acquisitions, expansion, and new product launches to offer high-quality and innovative products. These strategies boost the demand for architectural glass and are expected to drive the market during the forecast period.

?

The size of the overall global architectural glass market has been derived using both primary and secondary sources. To begin the research process, exhaustive secondary research has been conducted using internal and external sources to obtain qualitative and quantitative information related to the market. Also, multiple primary interviews have been conducted with industry participants to validate the data and gain more analytical insights into the topic. The participants of this process include VPs, business development managers, market intelligence managers, national sales managers, and external consultants-such as valuation experts, research analysts, and key opinion leaders-specializing in the architectural glass market.
