Report description:

The Asia Pacific dental radiography equipment market is expected to grow from US\$ 349.93 million in 2022 to US\$ 580.77 million by 2028. It is estimated to register a CAGR of 8.8% from 2022 to 2028.

Rising Awareness of Oral Diseases

World Oral Health Day is celebrated by the Federation Dentaire Internationale (FDI). It is the largest global awareness campaign on oral health. The annual campaign spreads awareness about oral hygiene practices for adults and children and illustrates the importance of oral health in maintaining general health and well-being. Every year Community Dental Services (CDS) raises awareness of oral health. Mouth Cancer Action Month runs for the whole month of November. The campaign raises awareness about dental diseases, their prevalence, and the importance of checking dental health regularly. Thus, oral diseases have been receiving considerable attention in recent years. Public awareness campaigns are expected to create ample opportunities for the growth of the Asia Pacific dental radiography equipment market in the coming years.

Asia Pacific Dental Radiography Equipment Market Overview

The Asia Pacific Dental Radiography Equipment Market includes Japan, China, India, South Korea, Australia, and the Rest of APAC. APAC is the fastest-growing market for dental radiography equipment due to an increase in the investments & developments of innovative solutions by market leaders, a rise in the geriatric population, and an increase in the prevalence of oral diseases.

www.scotts-international.com

Moreover, in China, the cases of untreated caries, severe periodontitis in adults, and other oral diseases are increasing. As per a study titled "Prevalence and factors contributing to dental caries in 12-15-year-old school adolescents in Northeast China," published in November 2021, a high prevalence of dental caries (53.65%) was exhibited among school adolescents and showed low awareness regarding oral health. The study also recommended that more oral and dental health education and promotion should be comprehensively integrated into school courses for adolescents to reduce dental problems. Furthermore, as per a study published in 2022, in China, the number of oral cancer (OC) cases increased from 12,390.24 in 1990 to 45,216.41 in 2019, with an increase of 264.94%. China recorded the fastest increase of 205.84% in OC-related deaths. Although the incidence of OC is not high in China, the burden of OC is heavy due to China's large population. Thus, increasing OC cases in the country will favor the adoption of dental radiography equipment in the coming years. These factors are anticipated to fuel the growth of the dental radiography equipment market in China during the forecast period.

Asia Pacific Dental Radiography Equipment Market Revenue and Forecast to 2028 (US\$ Million)

Asia Pacific Dental Radiography Equipment Market Segmentation

The Asia Pacific dental radiography equipment market is segmented into product, end user, and country. Based on product, the market is subsegmented into intraoral X-ray system, extraoral X-ray system, intraoral plate scanners, and cone-beam computed tomography imaging. The intraoral X-ray system segment registered the largest market share in 2022.

Based on end user, the Asia Pacific Dental Radiography Equipment Market is segmented into dental clinics, hospitals, ambulatory surgical centers, and others. The hospitals segment held the largest market share in 2022.

Based on country, the Asia Pacific Dental Radiography Equipment Market is segmented into Australia, China, India, Japan, South Korea, and the Rest of Asia Pacific. China dominated the market in 2022.

Acteon Group; Carestream Dental LLC; Dentsply Sirona Inc.; Envista Holdings Corporation; General Electric Co; Koninklijke Philips NV; Planmeca; Siemens Healthcare GmbH; and Vatech Co., Ltd are among the leading companies operating in the dental radiography equipment market in the region.
