

Surface Inspection Market by Component (Cameras, Frame Grabbers, Processors, Software), Surface Type (2D, 3D), System (Computer-based, Camera-based), Deployment Type (Traditional Systems, Robotic Cells), Vertical - Global Forecast to 2028

Market Report | 2023-01-23 | 318 pages | MarketsandMarkets

AVAILABLE LICENSES:

- Single User \$4950.00
- Multi User \$6650.00
- Corporate License \$8150.00
- Enterprise Site License \$10000.00

Report description:

The global surface inspection market is projected to grow from USD 4.0 billion in 2023 to USD 5.9 billion by 2028, registering a CAGR of 7.8%. The significant demand for smart cameras, advanced image sensors, and processors offering enhanced surface inspection of products across several industries is expected to support the market growth.

"Camera component accounted for largest share of surface inspection market in 2022"

Various types of cameras are available in the market. The parameters chosen to select a camera for an application are frame rate, area, line format, 2D or 3D technology, sensing technology, interface standard, and imaging technology supported by the camera. Imaging sensors capture light using CMOS or CCD technology and convert it to a set of pixels showing the presence of light in different areas of the observed part. Many applications, such as the inspection of packaging for proper lids and labels and large objects such as doors of automobiles, can require multiple cameras to cover large areas. Cameras are also being regularly upgraded in terms of resolution and frame rate.

"Asia Pacific to account for largest size of surface inspection market in 2022"

The market growth in Asia Pacific can be attributed to the high industrialization in China, Japan, and South Korea. The region consists of a diverse range of economies with varying levels of development and the presence of various manufacturers. Asia Pacific is considered a major global manufacturing hub and is expected to provide ample growth opportunities to the players in the surface inspection market.

The major players in the market are ISRA VISION (Germany), Cognex (US), OMRON (Japan), Teledyne Technologies (US), and

Keyence (Japan).

Research Coverage:

The surface inspection market has been segmented into component, surface type, system, deployment type, vertical and region. The surface inspection market was studied for the Americas, Europe, Asia Pacific, and Rest of the World (RoW).

Reasons to buy the report:

- Illustrative segmentation, analysis, and forecast of the market based on component, surface type, system, deployment type, vertical, and region have been conducted to give an overall view of the market.
- A value chain analysis has been performed to provide in-depth insights into the surface inspection market.
- The key drivers, restraints, opportunities, and challenges pertaining to the surface inspection market have been detailed in this report.
- The report includes a detailed competitive landscape of the market, key players, and an in-depth analysis of their revenues.

11.2.2.1	Adoption of brightfield and darkfield inspection technologies to maximize all macro defects	167
11.2.3	ROBOT VISION-BASED INSPECTION	167
11.2.3.1	Implementation of robotic cells in manufacturing industry to handle complex assemblies and tiny parts	167
11.2.4	PRINTED CIRCUIT BOARD (PCB) INSPECTION	168
11.2.4.1	Use of bar code reading technology to inspect appropriate placement of PCB components	168
11.2.5	SEMICONDUCTOR FABRICATION INSPECTION	168
11.2.5.1	Deployment of semiconductor fabrication inspection systems for high-speed wafer inspection	168
11.3	AUTOMOTIVE	169
TABLE 74	AUTOMOTIVE: SURFACE INSPECTION MARKET, BY SYSTEM, 2019-2022 (USD MILLION)	169
TABLE 75	AUTOMOTIVE: SURFACE INSPECTION MARKET, BY SYSTEM, 2023-2028 (USD MILLION)	169
TABLE 76	AUTOMOTIVE: SURFACE INSPECTION MARKET, BY REGION, 2019-2022 (USD MILLION)	170
TABLE 77	AUTOMOTIVE: SURFACE INSPECTION MARKET, BY REGION, 2023-2028 (USD MILLION)	170
11.3.1	ASSEMBLY VERIFICATION	171
11.3.1.1	Necessity to inspect assembly line to ensure proper functioning of complex configuration of components	171
11.3.2	FLAW DETECTION	171
11.3.2.1	Deployment of vision-based surface inspection systems to detect flaws and inspect surface quality of objects	171
11.3.3	PRINT VERIFICATION	171
11.3.3.1	Need to detect pre-printing errors such as missing content, color variation, and text/print errors	171
11.3.4	INSPECTION OF PAINTED SURFACES	172
11.3.4.1	Requirement to detect defect dents, scratches, and flaking on painted surfaces	172
11.3.5	INSPECTION OF CFRP AND GFRP CAR MATS	172
11.3.5.1	Necessity to inspect surface structure of carbon-fiber webs	172
11.3.6	INSPECTION OF WELD AND BRAZED SEAMS	172
11.3.6.1	Necessity of welded seam inspection of axle carriers, vehicle body, steel wheels, and seats in car body	172
11.4	ELECTRICAL & ELECTRONICS	173
11.4.1	SUITABILITY OF ROBOT-BASED SURFACE INSPECTION SYSTEMS TO DETECT BENT PINS ON PORTS AND CONNECTORS, LOOSE SCREWS, AND MISSING COMPONENTS	173
TABLE 78	ELECTRICAL & ELECTRONICS: SURFACE INSPECTION MARKET, BY SYSTEM, 2019-2022 (USD MILLION)	173
TABLE 79	ELECTRICAL & ELECTRONICS: SURFACE INSPECTION MARKET, BY SYSTEM, 2023-2028 (USD MILLION)	173
TABLE 80	ELECTRICAL & ELECTRONICS: SURFACE INSPECTION MARKET, BY REGION, 2019-2022 (USD MILLION)	174

TABLE 81□ELECTRICAL & ELECTRONICS: SURFACE INSPECTION MARKET, BY REGION, 2023-2028 (USD MILLION)□174

11.5□GLASS & METAL□175

TABLE 82□GLASS & METAL: SURFACE INSPECTION MARKET, BY SYSTEM, 2019-2022 (USD MILLION)□175

TABLE 83□GLASS & METAL: SURFACE INSPECTION MARKET, BY SYSTEM, 2023-2028 (USD MILLION)□175

TABLE 84□GLASS & METAL: SURFACE INSPECTION MARKET, BY REGION, 2019-2022 (USD MILLION)□176

TABLE 85□GLASS & METAL: SURFACE INSPECTION MARKET, BY REGION, 2023-2028 (USD MILLION)□176

11.5.1□CUT PLATE INSPECTION□177

11.5.1.1□Need for automatic inspection and rejection of glasses according to user-defined tolerance with minimum operator interventions□177

11.5.2□MIRRORED GLASS INSPECTION□177

11.5.2.1□Use of mirrored glass inspection for verification of glass identity, pinhole detection, and paint defect detection□177

11.5.3□FLOAT GLASS INSPECTION□177

11.5.3.1□Adoption of float glass inspection to detect inclusion, tin, and ream defects□177

11.5.4□COATED GLASS INSPECTION□177

11.5.4.1□Deployment of coated glass inspection systems in architectural and automotive industries□177

11.5.5□LAMINATED GLASS INSPECTION□178

11.5.5.1□Implementation of laminated glass inspection systems to detect bubbles, cracks, and scratches□178

11.5.6□PRISTINE GLASS INSPECTION□178

11.5.6.1□Employment of pristine glass inspection systems to detect strains, scratches, cracks, and fingerprints and provide crystal-clear images□178

11.5.7□STRUCTURED SOLAR GLASS INSPECTION□178

11.5.7.1□Adoption of structured solar glass inspection technique to detect round bubble and glass chip defects□178

11.5.8□COATING□178

11.5.8.1□Application of coating to prevent metal from rusting, as well as for cosmetic appeal□178

11.5.9□COLD ROLLING□178

11.5.9.1□Use of cold rolling to attain thinner sheets with roll speeds up to 7,000 ft per minute□178

11.5.10□CONVERTING□179

11.5.10.1□Adoption of conversion technique to convert metal sheets into smaller sizes for easy transportation□179

11.5.11□HOT ROLLING□179

11.5.11.1□Implementation of hot rolling technique to reduce metal thickness□179

11.6□FOOD & PACKAGING□179

TABLE 86□FOOD & PACKAGING: SURFACE INSPECTION MARKET, BY SYSTEM, 2019-2022 (USD MILLION)□180

TABLE 87□FOOD & PACKAGING: SURFACE INSPECTION MARKET, BY SYSTEM, 2023-2028 (USD MILLION)□180

TABLE 88□FOOD & PACKAGING: SURFACE INSPECTION MARKET, BY REGION, 2019-2022 (USD MILLION)□180

TABLE 89□FOOD & PACKAGING: SURFACE INSPECTION MARKET, BY REGION, 2023-2028 (USD MILLION)□181

11.6.1□QUALITY ASSURANCE□181

11.6.1.1□Consistent quality assurance to encourage customer loyalty and maintain brand image□181

11.6.2□GRADING□182

11.6.2.1□Need to check quality grades based on size, shape, and color□182

11.6.3□LABEL VALIDATION□182

11.6.3.1□Adoption of label validation technique to detect tears, double labels, wrinkles, and incorrect dates on packages and containers□182

11.6.4□SAFETY INSPECTION□182

11.6.4.1□Utilization of safety inspection systems to check quality and safety of packages and containers□182

11.6.5□GLASS CONTAINERS INSPECTION□182

11.6.5.1□Deployment of surface inspection technique to check quality of bottles at faster rate□182

11.6.6□METAL CONTAINERS INSPECTION□182
