Report description:

Air care was negatively impacted by the arrival of the pandemic since a large part of consumers considered these products as irrelevant. However, as fear of the pandemic has faded, consumers have turned to air care products again. Car air fresheners, which was the most impacted category in the pandemic, has made a good recovery with people on the move again, more commuting and the return of schools. Traffic has normalised leading to more time spent in cars and a need for car air fresheners.
