### **Report description:**

The global rise in energy and raw materials costs has had a significant impact on Ecuador's home care category in 2022. A large number of products, including dishwashing and laundry care, saw prices rise above the rate of inflation in Ecuador resulting in the contraction of retail volume sales in 2022. On a more positive note, the COVID-19 pandemic had a lower impact on the Ecuadorian economy in 2022, following the advanced vaccination plan that was put into place during the second half of 2021.
