### **Report description:**

Plant-based dairy has developed strongly in the last decade. It started with the inclusion of soy milk as an alternative for a plethora of consumers, such as those that cannot consume dairy products, people that have developed a strong sense of consciousness regarding the effects that the dairy industry has on the environment, and people aware of the quality of life for animals involved in the industry, amongst others. When soy milk appeared, it was seen as a good option, but as the plant-based...

Euromonitor International's Plant-based Dairy in Chile report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2017-2021, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth.
