Report description:

The Saudi Arabian rigid plastic packaging market is expected to grow at a Compound Annual Growth Rate (CAGR) of 5.21% over the forecast period. The study on the Saudi rigid plastic packaging market tracks demand for significant packaging format types such as bottles and jars, trays and containers, caps and closures, and cups and lids, among other products, along with corresponding end-user industry verticals, demand, and revenue accrued from the sales of these rigid plastic packaging products.

Key Highlights

Increased usage of oxo-degradable plastics; growing demand for rigid plastic packaging from various end-user industries; advances in technology leading to improved barrier solutions; introduction of active and intelligent packaging owing to increasing consumer demand, etc., are some of the major drivers for the market. Saudi Arabia has emerged as one of the largest markets for the rigid plastic packaging industry in the Middle East. The country has a vast consumer base and a wide range of industrial activities (excluding the oil and gas sector), contributing to the rapidly growing demand for plastic packaging.

The new plastic regulation is expected to affect many products, such as plastic cases, plastic containers, and other plastic packaging products. According to the new rules and regulations implemented by the Saudi organization SASO, plastic products must be made of approved oxo-biodegradable materials. This is expected to boost the investment for innovation and result in the introduction of new rigid packaging solutions in the market over the next two years to adhere to the unique regulatory needs and the needs of the end-user clients.

-With the growing demand for rigid packaging solutions, vendors in the market are strengthening their position by establishing a new division. SABIC launched a caps and closures division in Riyadh, Saudi Arabia, addressing issues in a circular economy by using the latest environmentally friendly materials and solutions in the closures market. It has built a strong position in producing caps and closures and extending its application coverage across food, beverage, and non-food areas.

A combination of population growth, industrialization, and economic expansion has increased personal consumption across Saudi

Arabia and generated massive amounts of plastic waste. As per the Arab news in January 2022, five Gulf Cooperation Council countries, Bahrain, Saudi Arabia, the UAE, Qatar, and Kuwait, rank in the top 10 worldwide in terms of solid waste per capita generation.

During the early spread of COVID-19, the demand for essential packed food and beverage products surged, and companies struggled to fulfill the rapidly changing demand landscape and faced supply chain disruptions. Furthermore, the rapid rise in e-commerce promoted the growth of rigid plastic packaging in food, beverage, and online pharmacy and drug store sales, contributing to the growth outlook.??

Saudi Arabia Rigid Plastic Packaging Market Trends

Increasing Demand across End-user Sectors to Drive the Market

The demand for rigid plastic packaging solutions has been experiencing positive growth across end-user sectors such as food, retail, consumer goods, cosmetics, pharmaceuticals, and others. The demand is attributed to rapid urbanization, which usually translates to increased consumer spending and production of consumer goods, a large expatriate population, and the changing dietary habits of the resident citizens.

Due to the increasing penetration of organized retail formats, such as hypermarkets, supermarkets, and e-commerce, the country's processed and packaged food market is exhibiting a strong growth rate.

The government's initiatives to diversify its economic dependence on the oil and gas industry resulted in its support for real estate developments and increased retail market opening. This is expected to open new opportunities for rigid plastic packaging and increase demand from various industries.

Saudi Arabia has the largest Food and Beverage (F&B) industry in the Middle East. The Saudi General Authority for Investment (SAGIA) predicts that spending on food service will increase by 6% per year in the coming years.

In 2021, Saudi Arabia exported approximately USD 1.1 billion worth of food products to the region, an increase of nearly 2% since 2020. The main products consisted of dairy, snack foods, processed foods, processed dates, processed fruit and vegetables, sugar and sweeteners, and poultry meat (Source: Food Export Association of the Midwest USA and Food Export USA-Northeast).

In April 2022, the Saudi Ministry of Environment, Water, and Agriculture called for investments in four agricultural projects to enhance the Kingdom's food security. The projects in Makkah, Qassim, and Jazanseek produce high-quality vegetables and fruits. Such developments are expected to increase the demand for rigid packaging solutions such as trays and containers in the food and beverage sector.

The recent developments in the healthcare, pharmaceuticals, and cosmetics markets are expected to remain the primary drivers of the demand for plastic packaging products. The increasing consumption of skin and healthcare products, primarily packaged using plastic materials, boosts the market's growth in the country.

Polyethylene Terephthalate (PET) Holds Major Market Share

Polyethylene terephthalate (PET) is an aliphatic polyester. It is semi-crystalline when stable, used in daily objects and can be easily recycled. It is used in automotive and electronics packaging, textiles, foils, and molded parts. It also shows resistance to impact, moisture, and solvents. Derived from PE, Polyethylene terephthalate, or PET belongs to the polyester family and is used in typical applications that are very lightweight, rigid, and flexible packages.

Polyethylene terephthalate (PET) is a popular plastic option for thermoforming due to its high-strength barrier and versatility. It can be molded into almost any shape before cooling to extend shelf life. The resulting resistance to tampering and external influences makes PET suitable for sensitive applications such as food containers, beverage bottles, and medical device packaging.

According to the International Trade Administration, the Middle East region is growing at an estimated 36%, with Saudi Arabia being the highest revenue generator in the regional market. Saudi Arabia recently accounted for about 52% of vehicles sold in the Gulf Cooperation Council (GCC). Sales are projected to reach 543,000 by 2025, with electric vehicles (EVs) accounting for just 32,000. This is anticipated to increase the demand for PET domestically, as automobiles are the primary end-user of the material. Increasing demand is expected to boost the polyethylene terephthalate market in the coming years.

PET plastic bottles are now replacing heavy and fragile glass bottles to provide reusable packaging for mineral water and other beverages and enable a more economical shipping process. Due to its transparency and natural CO2 barrier properties, PET has many applications and can be easily blown into bottles or molded into other shapes. Colorants, UV blockers, and other additives can be used to enhance the properties of PET to develop bottles that meet a brand's specific needs. In addition, particular features such as transparency make it highly versatile for various uses, especially bottled water. Polyolefins are some of the most crucial raw materials used for plastic packaging. According to the recent estimates of the GPCA, the country has around 95 kg per capita consumption of plastic, making it the largest consumer of plastic products in the entire GCC.

According to a survey conducted by ChemAnalyst in January 2022, Saudi Arabia's FMCG companies are still opting for 100% virgin plastic packaging. Additionally, Saudi Arabia's R-PET market is forecast to remain bearish as prices have fallen steadily, in line with stagnant demand patterns.

Saudi Arabia Rigid Plastic Packaging Market Competitor Analysis

The rigid plastic packaging industry is highly fragmented in Saudi Arabia, with market incumbents such as SABIC, Takween, Zamil Plastics, and Saudi Plastic Factory Company, accompanied by several regional Saudi Arabian contract packaging firms. Although the barriers to entry for new players are high, regional packaging companies are witnessing value in foraying, especially in the rigid packaging industry, owing to significant demand from industrial, food, beverage, and other end-user industries.

May 2022 - SABIC introduced the LNP ELCRIN WF0061BiQ resin, made from ocean-bound plastic waste (PET) bottles, for chemical upcycling into polybutylene terephthalate (PBT) resin.

January 2022 - SABIC announced a new collaboration with Ella's Kitchen, the United Kingdom's leading baby food brand, to create a new cap from recycled plastic. Over 3.5 million of Ella's Kitchen's Organic Strawberries and apple pouches were to have this new cap and be on the shelves in UK stores.

www.scotts-international.com

- 4.1 Market Overview
- 4.2 Industry Value Chain Analysis
- 4.3 Industry Guidelines and Policies
- 4.4 Industry Attractiveness - Porter's Five Forces Analysis
 - 4.4.1 Bargaining Power of Suppliers
 - 4.4.2 Bargaining Power of Buyers/Consumers
 - 4.4.3 Threat of New Entrants
 - 4.4.4 Intensity of Competitive Rivalry
 - 4.4.5 Threat of Substitutes
- 4.5 Assessment of COVID-19 Impact on the Industry
- 4.6 Current Trade Scenario - Import and Export Analysis

5 MARKET DYNAMICS

- 5.1 Market Drivers
 - 5.1.1 Demand for Oxo-degradable Plastics is Expected to Increase with New Regulations Being Enforced
 - 5.1.2 Increasing Rigid Plastic Packaging Solutions Demand Across the End-user Industry
- 5.2 Market Restraints
 - 5.2.1 Environmental Concerns Over Recycling and Safe Disposal and Price Volatility of Raw Materials
- 5.3 Coverage on the Emerging Alternatives to Rigid Plastic and Their Current Demand
- 5.4 Assessment of End-user Buying Patterns and Key Influencers

6 MARKET SEGMENTATION

- 6.1 By Material
 - 6.1.1 Polyethylene (PE)
 - 6.1.2 Polyethylene Terephthalate (PET)
 - 6.1.3 Polypropylene (PP)
 - 6.1.4 Polystyrene (PS) and Expanded Polystyrene (EPS)
 - 6.1.5 Polyvinyl Chloride (PVC)
 - 6.1.6 Other Rigid Plastic Materials
- 6.2 By End-user Industry
 - 6.2.1 Food
 - 6.2.2 Beverage
 - 6.2.3 Healthcare and Pharmaceutical
 - 6.2.4 Cosmetics and Personal Care
 - 6.2.5 Other End-user Industries
- 6.3 By Product Type
 - 6.3.1 Bottles and Jars
 - 6.3.2 Trays and Containers
 - 6.3.3 Cups, Tubs, and Pots
 - 6.3.4 Caps and Closures
 - 6.3.5 Other Product Types

7 COMPETITIVE LANDSCAPE

- 7.1 Company Profiles
 - 7.1.1 SABIC (Saudi Basic Industries Corporation)
 - 7.1.2 Zamil Plastic Industries Co.
 - 7.1.3 Arabian Plastic Industrial Company Limited

Scotts International. EU Vat number: PL 6772247784
