Report description:

Owing to the outburst of COVID-19 the Bahrain Microwave oven market was moderately impacted. However, the sales were impacted during the first quarter of the pandemic due to the restrictions and supply channel disruption but the sales went up slowly. This is attributed to rising in work-from-home culture, which has led the customers to stay home and cook food more easily.

The robust growth of the hospitality sector and rising catering contracts for large-scale functions, seminars, and other social gatherings are also expected to drive the demand for commercial appliances over the forecast period. Economic factors, such as the rising population, increasing disposable income of consumers, and growing awareness about different cooking appliances, such as microwave ovens, grills, and barbeques, are projected to impact the market positively. In Bahrain rising standard of living of customers, an increasing number of nuclear families, and surging demand for frozen and ready-to-eat food are some of the key factors driving the market growth. The convection segment of the market is poised to account for half of the overall market. The demand for a microwave oven may gain strong support from the rising consumer spending on kitchen appliances. The adoption of kitchen and home appliances is forecast to witness robust growth, owing to the increasing rate of urbanization.
