- Single User License \$4750.00
- Team License (1-7 Users) \$5250.00
- Site License \$6500.00
- Corporate License \$8750.00

Report description:

The main focus of investment banking is obtaining capital for businesses, governments, and other organizations. For all kinds of firms, investment banking activities include underwriting new debt and equity instruments. Additionally, investment banks will help with reorganizations, mergers, and acquisitions, as well as broker trading for institutions and individual investors. Investment bankers collaborate with businesses, governments, and other organizations. They organize and oversee huge projects' financial components. Investment bankers are employed by investment banks to assist businesses, governments, and other organizations with the planning and management of significant projects. Investment bankers assist their clients to save time and money by anticipating project hazards.

The COVID-19 epidemic had a significant effect in US on all aspects of the investment banking industry, including bank performance, covered clients, and transaction activity. With workers being relocated to a work-from-home environment, the operation of financial institutions' investment banking (IB) divisions has also been seriously affected, creating enormous operational, cultural, and business issues. Clients of the IBs have been negatively impacted by the economy. Corporate clients needed access to credit lines to increase cash on hand and cut down on capital expenditure because they were facing major revenue and cost issues. Massive increases in redemptions and declining asset values have also had an impact on institutional investors. To counteract the decline in economic activity and to maintain market confidence, national governments have implemented fiscal and monetary stimulus.

Investment banks generally support significant, complex financial transactions. If the investment banker's client is considering an acquisition, merger, or sale, they might offer guidance on how much a firm is worth and the best way to organize a deal. In essence, they help with the selling of securities, mergers, and acquisitions, reorganizations, and broker trades for both institutions and individual investors, in addition to underwriting new debt and equity securities for all kinds of firms. Additionally, they might

issue securities to raise money for the client groups and provide the paperwork required by the US Securities and Exchange Commission (SEC) for a firm to go public.

US Investment Banking Market Trends

Artificial Intelligence is driving the market

The banking and financial sector is slowly catching up with this development. Customers can organize their financial affairs with the help of chatbots, while banks use machine learning algorithms to spot patterns in cybercrime. Several fast-developing diversified AI technologies are having an impact on the banking sector, and firms are expanding their investments in AI to reach their full potential.

AI can be applied in a variety of ways to analyze important data and boost organizational effectiveness. It has a variety of uses, including fraud detection, risk management, and customer service. We can anticipate seeing even greater use of AI in the banking sector in 2022 as businesses look to take advantage of its many advantages.

The banking sector is being impacted by the different AI technologies that are quickly growing. Organizations are expanding their investments in AI to realize its promise for analyzing crucial data and enhancing operational effectiveness. In 2022, the investment banking sector will probably be driven by the creation and effective use of AI, opening up opportunities to engage in more consequential and transformational technology themes.

The rise of Decentralized Finance

Decentralized Finance, or Defi, is currently the talk of the financial services sector. Defi is a system that enables secure, programmable, real-time transactions between holders of digital assets using blockchain and related technology. Defi is frequently referred to as "bankless finance" because there is no single organization in charge of regulating these transactions. Although this suggests more danger, it also suggests more control and reduced processing costs for participants.

Goldman Sachs is one of the biggest banks in the world, and many others are starting to embrace bitcoin and other cryptocurrencies. Others in the investment banking sector are making predictions regarding the impact of blockchain on the sector. One thing is certain, though: DeFi is still in its initial phases, so keeping up with the most recent advancements in this field is essential. DeFi has a significant impact on the financial services industry.

The usage of decentralized finance, or Defi, was most prevalent in nations like the United States and China that exchanged or transferred significant quantities of bitcoins. Contrary to a global country ranking on cryptocurrency ownership, consumers from developing countries were significantly more likely to own bitcoin than customers from industrialized nations. Defi is designed to either gain access to cryptocurrencies or move them around. Traders and institutional investors are mostly interested in the cryptocurrencies of the United States, China, the United Kingdom, and India.

US Investment Banking Market Competitor Analysis

The report includes an overview of not only the largest investment bankers by revenue earned, but also major boutique banks categorized by size, region, and industry focus operating in the market studied. Table of Contents:

1 INTRODUCTION

- 1.1 Study Assumptions and Market Definition
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS AND INSIGHTS

- 4.1 Market Overview
- 4.2 Market Drivers
- 4.3 Market Restraints
- 4.4 Insights on Various Regulatory Trends Shaping Investment Banking Market
- 4.5 Insights on the impact of technology and innovation in Investment Banking Market
- 4.6 Industry Attractiveness - Porters' Five Forces Analysis
 - 4.6.1 Threat of New Entrants
 - 4.6.2 Bargaining Power of Buyers
 - 4.6.3 Bargaining Power of Suppliers
 - 4.6.4 Threat of Substitutes
 - 4.6.5 Intensity of Competitive Rivalry
- 4.7 Impact of COVID-19 on the Market

5 MARKET SEGMENTATION

- 5.1 Type of Product
 - 5.1.1 Mergers and Acquisitions
 - 5.1.2 Debt Capital Markets
 - 5.1.3 Equity Capitals Market
 - 5.1.4 Syndicated Loans
 - 5.1.5 Others

6 COMPETITIVE LANDSCAPE

- 6.1 Market Concentration & Overview
- 6.2 Company Profiles
 - 6.2.1 Morgan Stanley
 - 6.2.2 J.P Morgan Chase and co.
 - 6.2.3 Goldman Sachs
 - 6.2.4 Credit Suisse
 - 6.2.5 UBS
 - 6.2.6 Bank of America
 - 6.2.7 Evercore
 - 6.2.8 CITI
 - 6.2.9 HSBC
