2023-2027, on the account of increasing instances of gynecological diseases among the female population. Rising awareness regarding gynecological diseases and growing demands for early diagnosis and efficient treatment for the same are further driving the growth of the UAE gynecology surgical devices market in the upcoming five years.

Growing Disease Burden Drives Market Growth

Rising instances of gynecological diseases among the female population are actively driving the growth of the UAE gynecology surgical devices market in the upcoming five years. Regional risk factors and skepticism toward regular gynecologist visitation increases the risks of gynecology disorders and diseases among the population. To provide better healthcare services to patients the government has focused actively on increasing the healthcare infrastructure. With increasingly better healthcare infrastructure, the demand for better medical devices such as gynecology surgical devices, and diagnostic devices further increased. Thus, aiding the growth of the UAE gynecology surgical devices market in the next five years.

Growing Investment Influences Healthcare Advancement

The government of the United Arab Emirates has a prevalence of higher investments in the healthcare sector and its products & services. The lack of research and innovations in medical devices, equipment, tools, and technologies is compensated by the growing imports of them from the neighboring countries. In 2019, the UAE government spent 4.27% of its GDP on the year over the healthcare industry and its advancement.

Moreover, the population of the country is also actively investing the rising disposable income to afford lavish healthcare services. The government is also promoting the local manufacturers to form collaborations with the global giants to promote local manufacturing of medical devices that would also aid the growth of the UAE gynecology surgical devices market in the future five years.

Market Segmentation

The UAE gynecology surgical devices market is segmented by type, end-user, competitional landscape, and regional distribution. Based on type, the market is further segmented into gynecological endoscopy devices, endometrial ablation devices, fluid management systems, female sterilization/contraceptive devices, hand instruments, and others. Gynecological endoscopy devices include hysteroscopes, colposcopes, resectoscopes, laparoscopes, and others.
