Report description:

After the huge setback in 2020 and the limited recovery seen in 2021, cafes/bars saw positive value growth in 2022. This was boosted by consumers returning to previous habits, with many eager to go out and enjoy themselves after the previous years of restrictions. This pent-up demand increased sales and visits, which was further aided by the positive summer weather, encouraging consumers to spend time outside the household, especially in bars/pubs.
