Report description:

The South & Central America dental milling machines market is expected to grow from US\$ 156.24 million in 2022 to US\$ 244.71 million by 2028; it is estimated to grow at a CAGR of 7.8% from 2022 to 2028.

Rising Burden of Dental Diseases and Increasing Geriatric Population Drive South & Central America Dental Milling Machines Market

Oral diseases, including dental diseases, are highly preventable. However, these diseases can be a major health burden for many countries and affect people throughout their lifetime. A few common dental problems include dental caries (tooth decay), periodontal diseases, and tooth loss. Thus, the increasing geriatric population and rising burden of dental diseases are boosting the demand for teeth replacement and other restoration procedures, which is fueling the South & Central America dental milling market growth.

The South & Central America dental milling machines market is segmented into Argentina, Brazil, and the Rest of South & Central America. The market for dental milling machines in the region is expected to grow due to the growing dental sector and increasing medical tourism in Argentina and Brazil. Furthermore, the government support for dental care and initiatives for the promotion of good oral health through generating awareness campaigns are also expected to foster the growth of the region.

Moreover, in 2004, the Brazilian National Health Service, Sistema Unico de Saude (SUS), launched the National Oral Health Policy "Politica Nacional de Saude Bucal (PNSB)" to expand dental care at primary healthcare. In 2006, specialized dental centers (CEOs) were implemented, providing endodontics, periodontics, surgery/stomatology, and treatment for patients with special needs. Since the implementation of this policy, an expansion in the number of oral health teams in primary care was observed, resulting in population coverage of 41.2%. Regarding the expansion of secondary care, 1,134 Centers of Specialized Dentistry were established between 2004 and 2019, significantly increasing the availability of oral health services for the population of Brazil.
