Report description:

Discounters was the fastest growing channel in grocery retailing in 2022. In an inflationary environment, for certain consumer groups, value proved to be the most important factor when doing their grocery shopping. Following such strong growth in 2020 and then a decline in 2021 as the economy reopened, the value sales of discounters recorded substantial growth in 2022.

Euromonitor International's Discounters in Belgium report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
