**Report description:**

The North American healthcare IT market is projected to reach USD 496.7 billion by 2027 from USD 193.2 billion in 2022, at a CAGR of 20.8% during the forecast period. Growth in this market is driven by the growing government initiatives to support healthcare IT solutions, high returns on investment associated with healthcare IT solutions, and need to curtail escalating healthcare costs. However, increased data security concerns, reluctance among medical professionals to adopt advanced healthcare IT tools are challenging the growth of this market.

"The telehealth solutions segment is projected to be the largest segment in the clinical North American healthcare IT market" Based on the type of clinical HCIT solutions, the telehealth solutions segment is projected to be the largest segment during the forecast period. This is majorly attributed to the government initiatives for eHealth across the globe, the increasing need to improve the quality of care, growing consolidation among healthcare providers, and the rising adoption of digital and connected healthcare technologies. The demand for healthcare services and increased adoption of predictive analytics are also expected to fuel the growth of this segment.

"Healthcare Providers was the largest segment by the end user of North American healthcare IT market in 2021" Healthcare providers segment is projected to grow at the highest growth rate in the North American healthcare IT market in 2021. Growing need to curtail healthcare costs, rising need for better financial outcomes, healthcare reforms, and the need to improve patient care while increasing operational efficiency is expected to drive the demand for healthcare IT services in the coming
