Report description:

Like air care, home insecticides significantly benefited from home seclusion as the pandemic in Chile resulted in prolonged lockdowns, resulting in double-digit retail volume growth in 2020. Spending greater time at home than ever before, local consumers were more aware of the presence of bugs. At the same time, in line with heightened hygiene awareness, the general risk of disease transmitted by insects meant that consumers made considerable efforts to eradicate them from their homes. Therefore...

Euromonitor International's Home Insecticides in Chile market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, packaging innovations, economic/lifestyle influences, distribution or pricing issues.
