Report description:

Inflation remains high, making imported goods more expensive for consumers and restricting purchases of non-essentials, despite a degree of post-COVID-19 recovery. Retailing remains underdeveloped, with informal retailing dominant and benefiting from consumer price sensitivity. Traditional retailers are stronger than modern retailers, which only appeal to affluent urbanites. Modern retailers are growing in urban locations, led by supermarkets and convenience stores.

Euromonitor International's Retail in Laos report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Retail E-Commerce, Retail Offline.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
